## January Blocks

January brings the return of the Drunkard's Path unit. This month uses the same templates and techniques that were introduced in November, but with the prints in reverse positions.

Drunkard's Path unit B is the second of three Drunkard's Path variations used throughout the Stars of the City pattern. It forms the curved edges of the block borders, adding to the unique finished shape of the blocks used in this pattern.

As a variation on the traditional curved pieced Drunkard's Path unit, there are also instructions for a straight pieced Pseudo Drunkard unit. Both versions finish at the same size and can be used interchangeably.

To make either throw sized quilt, make 32 of Drunkard's Path unit B.

To make an XL twin sized quilt, make 48 of Drunkard's Path unit B.

To make a queen sized quilt, make 72 of Drunkard's Path unit B.

# Drunkard's Path Unit B

## Cutting Instructions

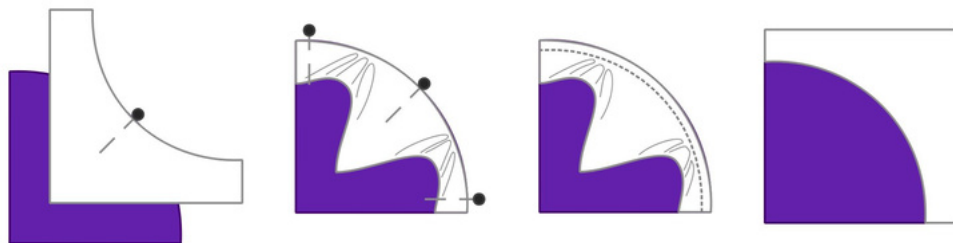

To make one unit, cut the following:

**Fabric A:** 1 Drunkard's Path template B

**Fabric B:** 1 Drunkard's Path template A

## Piecing Instructions

Mark the centre of the curved edge on both Drunkard's Path pieces. Place pieces right sides together with centre points aligned, pin at the centre point to secure. Ease the curved edge of piece B around the curve of piece A until the corners meet, pin the ends to secure. Sew around the curved edge.

Trim to 4½" to complete Drunkard's Path unit A.

# Pseudo Drunkard Unit B

## Cutting Instructions

To make one unit, cut the following:

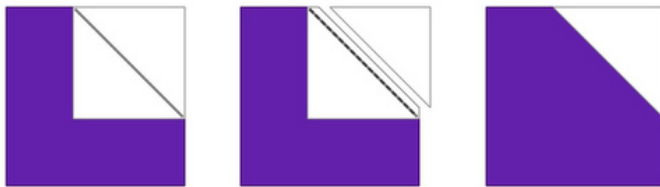

**Fabric A:** 1 square at  $2\frac{3}{4}$ "  
1 rectangle at  $1"$  x  $4\frac{1}{2}"$   
1 rectangle at  $1"$  x  $4"$

**Fabric B:** 1 square at  $4"$

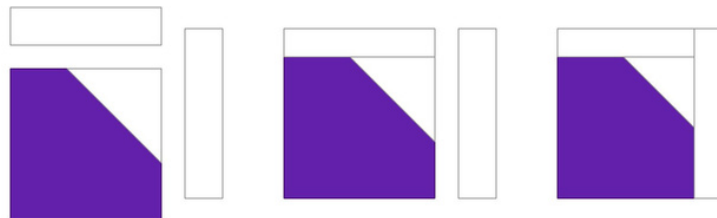

## Piecing Instructions

Draw a diagonal line on the back of the fabric A square.

Place the fabric A square on one corner of the fabric B square with the drawn line oriented as shown. Sew directly along the drawn line, then trim excess fabric, leaving  $\frac{1}{4}"$  for seam allowance.

Sew the remaining rectangles of fabric A to the unit so they both run adjacent to the fabric A triangle as shown.

Trim to  $4\frac{1}{2}"$  to complete Pseudo Drunkard unit A.
